Fiscal Year 2017 (58th term) Operating Results

Masahiro Murai, Managing Director

Find Your Beauty **MILBON**

Due to the change in the accounting period, the fiscal year under review is the 12 months plus 11 days from December 21, 2016 to December 31, 2017. For the consolidated accounting, financial results for overseas consolidated subsidiaries are their respective individual results for the 15-month period from October 1, 2016 to December 31, 2017. For that reason, the financial results values used for comparison in these materials have been calculated based on the 12 months prior to the change in the accounting period.

Notation in these materials	Respective periods	Periods for subsidiaries
FY2017 (12 months)	December 21 to December 20 of the following year (12 months)	October 1 to September 30 of the following year (12 months)
FY2017 (Irregular accounting period)	December 21 to December 31 of the following year (12 months plus 11 days)	October 1 to December 31 of the following year (15 months)

17,711	18,688	976	5.5	19,511

- In premium brands, the Aujua upgrade carried out in November received even higher ratings than expected. Steady progress of “milbon” in salons, including overseas, contributed to good results.
- Professional brands struggled somewhat due to difficulty in keeping them compartmentalized from premium brands. Sales strategies will need to be restructured in future.

A Premium Brand, “milbon”

Overseas rollout also progressed steadily

Brand concept

A system hair care brand that cultivates the “unique beauty” of each individual, with 360° shiny hair

What is “milbon”?

We conducted an in-depth analysis of the inner structure of the hair of women from 20 countries around the world, using our proprietary CT scanning technology, and discovered SSVs (Sticked-Shaped Voids). SSVs are hollow, tubular gaps that form in damaged hair. Accordingly, we developed a hair care line containing ingredients capable of repairing such hollowed out hair and increasing the density within each strand of hair. “milbon” is a system hair care product for developing shiny, beautiful hair from the core.

Number of salons

As of December 31, 2017.....3,966 salons

- We introduced a new brand, "ORDEVE Addichthy," to respond to the desires of women who want to continue to display freedom in their hair color design. Sales significantly exceeded annual targets, thanks to a positive reception for its ability to easily express color by eliminating red tones.

New Product

ORDEVE Addichthy

Erases red-tinged brown with high saturation blue. With clear and transparent color expression, it lets customers freely realize individual hair color designs.

Outlook of Overseas Subsidiaries (1)

USA (MILBON USA, Inc.)

Sales did not grow as expected owing to a series of closures and consolidations of major salons due to soaring rents in Manhattan and other factors, and a hike in the distributor margin in the distributor category offsetting steady growth in outside sales.

By product, “milbon” grew significantly as a result of activities focused on hair care, styling and scalp care, but was not able to cover a decrease in sales in other categories.

With a view to the next fiscal year and beyond, we started considering distributors in Georgia, Texas and other areas and began preparing the sales and training system for hair colors scheduled for launch in 2019.

CHINA (Milbon Trading (Shanghai) Co., Ltd.)

In the market environment, high unit-price trendy salons that offer personalized service are increasingly successful in attracting customers. Also, customer preferences are shifting toward services such as hair color design and salon treatment. Amid this trend, ORDEVE’s high-quality training activities and introduction of trendy colors have been well-received for allowing personalized service, and hair color products have grown significantly.

In hair care products, the first “milbon” launch was focused on 40 influential salons. Customer satisfaction has been extremely high, and we anticipate strong performance from future rollouts.

In addition, regular implementation of OJT has significantly raised awareness among locally hired manager-level employees. This in turn improved the quality of activities for distributors and salons, in a positive cycle that leads to results.

*Figures in the text on pages 16 and 17 are based on local currencies.

Outlook of Overseas Subsidiaries (2)

KOREA (Milbon Korea Co., Ltd.)

Regionally based market activities were further strengthened through the opening of the Daejeon Branch, following the branches in Seoul and Pusan. These moves are producing results.

In hair color products, ORDEVE has grown considerably due to the continuing favorable reception for training on trends in connection with the launch of seasonal trend colors that cannot be imitated by other companies. In hair care products, Aujua has been growing steadily in its introduced salons.

THAILAND (Milbon (Thailand) Co., Ltd.)

[Sales division]

We are starting to see positive effects as a result of concentrating our market activities by focusing on a single distributor, which has also allowed us to share market information.

In hair color products, sales have grown steadily, partly due to the synergy effects of activities to introduce new color trends from ORDEVE and a launch focused on cold shades from Addicthy. The “milbon” products launched in the period under review have been highly rated for their finish texture and feel. We focused on target salons, and the need for two training sessions has been accepted, so performance looks promising going forward.

[Production division]

Production has expanded far more than planned, reflecting a steady growth in production of hair color products, the start of production for “milbon” for commercial use, and the start of shipments to China. The local procurement rate is also rising steadily. As a result, the manufacturing cost ratio has improved substantially.

With regard to the quality-control system, errors and inconsistencies are rare, managers and frontline personnel are both developing, and the employee turnover rate is less than 1%.
